## COUNCIL WILL INVESTIGATE GAS FRANCHISE

Have Instructed Town Solicitor to Investigate Validity of Franchise Granted to Gas Company—Also Instruct Further Investigation into Raising of Gas Rates.

At the regular meeting of the town council held last Tuesday evening the business brought up proved a little more interesting and exciting than the usual routine work. Two divisions were called for and in each case the mayor had the deciding vote. These were on a motion to increase a business tax, and on the introduction of a by-law setting the tax rate and assessment along the lines suggested by Mr. Evans while on his visit here last week.

The mayor and all the councillors were present. After the reading and adoption of the minutes of previous meetings, a letter from Mr. Evans, in which he reviewed the ground covered by the joint meeting of the council and representatives at week, and also outlining the proposals which were prepared to make to the bondholders, was read.

The contents of this letter were as stated in our last issue in the report of the meeting referred to and were to the effect that the assessment on improved property should be in the form of actual value and the mill rate placed at 40 mills. Besides this an additional \$10,000 of this year's interest was added to the amount of interest in arrears to be refunded over a period of ten years. This means that in all something to the neighborhood of \$50,000 in past due and current interest has been recommended by the commission for payment.

On motion of Councillors Oakland and Broughton the letter was received and filed.

Moved by Councillor Broughton, seconded by Councillor Watts that a by-law be prepared to provide for the imposition of a business tax in town. The mover and seconder were of the opinion that an effort should be made to get in as much tax as possible, and they thought this was one way. Councillor Stone said he did not see what was to be gained by reducing the mill rate if some other form of taxes were to be imposed. He thought Oakland said that this would in many cases be placing an additional burden on those who were already paying a large percentage of the taxes. Councillor Keats was of the opinion that this would be a burden on those who were least able to pay it, and that a few if any merchants in town making any money these times.

The vote on the motion resulted as follows:

Yeas—Councillors Watts, Learmonth and Broughton.

Nays—Councillors Oakland, Keats and Stone.

In casting the deciding vote the mayor said that in view of the assurance that the legislature would, at this session, pass an act providing for the levying of a service tax which would in all cases be binding, he would vote nay. The motion was, therefore, declared lost.

When the matter of introducing the necessary by-law setting the mill rate and assessment was brought up, there was another division. Councillors Learmonth, Broughton and Oakland were not to raise the assessment until the act, compelling towns to do so, had passed the legislature. The other Councillors said they had the assurance of Mr. Evans that such would be done at this session of the legislature and they did not think it could be gained by the delay. It meant retarding the work of setting the tax rate.

The by-law was then introduced and seven readings on the following divisions:

Yeas—Councillors Watts, Keats, and Stone.

Nays—Councillors Learmonth, Broughton and Oakland.

The mayor voted Yes.

An no by-law can be given its third reading and finally passed at six o'clock.

## U.F.A. of Redcliff Riding Organizes

At the conclusion of the U. F. A. convention held in Medicine Hat last Thursday for the purpose of selecting a candidate for the federal riding, a meeting of representatives of the provincial riding of Redcliff was held on Friday, to organize this provincial riding for political purposes.

It was openly stated that it is the intention of the farmers to put in a candidate to contest the seat at the next election. The present member is Hon. C. S. Pugh, the speaker in the provincial house.

H. W. Wood, president of the U. F. A., specially remained over in Medicine Hat in order to address the meeting. Alex. Moore, the farmer's member for Cochrane, was also in attendance, and referred to the methods that had been adopted in his constituency in winning a victory for their movement.

C. H. Harris, president of the Medicine Hat federal constituency, also spoke and during his remarks castigated the tactics of old line politicians.

H. W. Wood made one of his characteristic speeches on the rights of citizenship. Turning his attention more especially to the province, the president said he did not know what was going to happen. He did not know how many representatives were going to elect to the provincial parliament, but he said, "but we do know this: if enough districts elect representatives to the provincial to take the responsibility of government of this province it is going to be a tremendous responsibility and they will be in a position where we will be on us. Redcliff is one district only. You have got to send one man or woman—the very best you have in the district will be none too good. Select a man or woman who has mental capacity; a man or woman who has a thorough appreciation of the responsibility that he or she will have in the government. Develop a leadership, a force, in our movement that is skilled and capable to take hold of the affairs of government."

To be perfectly frank, he said, he had been thinking that they would not have to take that responsibility at the next election. "I did hope that a group of 12 or 15 of the very best men and women we have in the province would be put into the legislature, and for the responsibility to rest on a moderate class. We would be a tremendous force with the right kind of representatives and at the same time we would be training and developing a leadership force in the province to build later a greater force and we had to undertake the responsibility of government we would be thoroughly trained. He was not at all in favor of elections upon anyone at all. He would say that if they had to undertake that responsibility that they would not be any worse than the present government. That, however, was not the question in the meantime, it was whether the legislature that there should be a clear conception of sanity, and they, as farmers, for the first time in their lives, were beginning to understand the true meaning of the term."

A constitution similar to those of the other U. F. A. district associations was adopted, and the following officers were elected:

President—John Powell, Social Plains.

Directors—N. 1 Dist., R. Mulholland, Lake Lake; N. 2, T. Glen, Cochrane; N. 3, J. C. Brown, Cochrane; N. 4, J. C. Brown, Cochrane; N. 5, J. C. Brown, Cochrane; N. 6, J. C. Brown, Cochrane; N. 7, J. Advertising Rates Furnished on Application.

THURSDAY, MARCH 31, 1921.

Every man needs a man something if he will only  
REALLY THINKERS.

## A GOOD DAY'S WORK.

From what we can gather a large proportion of the ratepayers of the town are of the opinion that the Town Council did a little bit of work last Tuesday week, when it got a representative of the Municipal Finance Commission to come down here and go to work into the town's financial affairs with the Council and the ratepayers.

As an outcome of this meeting the representative of the Commission appears to have been convinced that the Council were right in their contention that some change had to be made in the proposed tax rate for this year if the future welfare of the town was to be considered.

While the Councilors may not have accomplished all they had hoped to, yet they have been successful in bringing about a change which will be much more satisfactory and encouraging to the majority of ratepayers. It had not been for the move on the part of the Councilors the mill rate would have been as high as last year—55 mills—and possibly higher, and the assessment would have been increased as well. According to the agreement arrived at the assessment is to be raised as suggested by the Commission but the mill rate is to be reduced to 40 mills. This will figure out at a slight reduction on the taxes on improved property over last year, and a considerable reduction of the taxes on vacant land. On the whole the outcome gives a much more promising outlook for the future.

Since the Councilors are doing their part to try to improve conditions it is now up to the ratepayers to do their part to the limit.

## LOOKS LIKE GOOD ADVICE.

Reading between the lines of the reported address delivered by H. W. Wood at the meeting of U. F. A. representatives from Redcliff provincial constituency held last Friday, one could not help but come to the conclusion that the U. F. A. president is not very anxious that the organization of which he is the head officer, should come into power as a result of the next provincial election. Nor could his remarks be taken to indicate that he is very anxious to have a U. F. A. candidate in the field in this provincial riding in the next election.

Mr. Wood is of the opinion that the organization would be acting wisely if for the president it were content to have twelve or fifteen of its members elected at the next provincial election, and that these elected members start in to prepare themselves for taking over the reins of power later on.

Since experienced men in any line of business are preferable this looks like good advice from President Wood.

Constable Everett informs us that during the past few weeks there have been occasions that sneak thieves are at work in town. On different occasions clothes lines have been relieved of some of their contents, and other articles of various kinds which have been left lying carelessly around, have been lifted. Nor are farmers' rigs and automobiles overlooked. These have been visited and robes, blankets and parcels removed. It would be well, therefore, if a little extra precaution were taken in looking after the loose things.

## Brooding and Feeding And the Baby Chicks

The brooding and feeding of baby chickens, whether by hen or by artificial means, is the crucial part of raising poultry. It is impossible to over-feed a young chicken, once the feather stage is reached. The more good food it can be induced to eat, the better the growth, and the better the growth the earlier maturity and egg yield. If the chicks are to be brooded by the natural method they should be allowed to remain in the setting nest with the hen until they are fully and seem inclined to get out themselves. The hen should then be treated with a little blue (non-toxic) ointment smeared on the feathers of the abdomen and under the wings. It is advisable to use ointment at this stage; powder is likely to get in the little chicks' eyes.

An ash-pail cover with removable bottom is to be recommended on account of its simple and cheap construction. It should be used with the bottom in place and slightly raised from the ground in the early spring months.

When the weather becomes warmer and the ground thaws out, they are better used without bottoms, but the coop must be moved to fresh ground daily.

**AMATEUR THEATRICALS.**  
No form of entertainment is better suited for the small community than amateur theatricals. To the production of a play every household may contribute something, from the actor to some single piece of stage

furniture or "property" upon which, though in itself insignificant, the success of the performance may depend. Often the only obstacle in the way of attempting such plays is the difficulty of finding just the right kind of piece, of the right length and with the right number of players. Through its travelling Libraries Division the Department of Extension of the University of Alberta endeavours to remove this difficulty. A number of plays suitable for production by amateurs have been assembled and may be borrowed on the same conditions as the books from the Open Shelf, namely on payment of postage. In making an application for these plays the intending borrowers should state the kind of play wanted, serious comedy light comedy, or farce; number and sex of players; and the length of play; whether it is to be part or an whole of an evening's entertainment. Attention to these points will insure better service to a large number.

## OUR AGRICULTURAL SCHOOLS

By her school of agriculture public instruction has taken the step, if not too slowly in agricultural education, of least in definite and specific instruction for the young in the requisites of farming as a vocation. No province has neglected the subject, but none has gone more directly to its root, and by its creation of six schools of agriculture the province has attracted considerable attention to itself. By means of these schools nearly a thousand young people have been equipped for their life work. When it is stated that, from funds supplied under the Agricultural Instruction Act alone, a no smaller sum than

\$500,000 has been employed in the last half dozen years in Canada in the building, equipping and maintenance of such schools, some idea of the benefits derived from the grants under the Act can be obtained. Official reports for the years 1918-20, of the \$68,005 which is Alberta's share of \$1,100,000 granted annually by the Dominion for division between the provinces, \$38,000

was devoted to the Alberta schools of agriculture. In the same years \$9,000 was allotted to instruction in women's work and \$2,000 to the poultry and egg-marketing service. In the same year there was allotted \$10,000 to the agricultural representative system. School farms, based chiefly on school garden work, and school clubs for the rearing of poultry, calves,

colts and pigs, are conducted under the direction of teachers from the schools of agriculture with the assistance of the agricultural representatives, and are increasing in number and importance every year. In 1919-20, for instance, 40 school farms, representing 440 schools and 5,500 pupils were held, with approximately 25,000 exhibits.

## CREDIT AUCTION SALE

Of Horses, Implements and Household Effects, Etc.

I have received instructions from Mr. Jas. G. Moffatt, to sell by Public Auction, on his premises, S. 1/2 10-14-8-4, two and a half miles west of Bowell, on Tuesday, April 5th, the following property:

## HORSES.

Four Geldings ranging 7 years old; there are extra good harness horses; weigh 1400 and well broken to all kinds of work.

Two Geldings raising 4 years; weigh 1400.

One Grey Filly raising 4 years; weigh 1350.

Three splendid breed mares; all young.

One horse colt, raising 2 years.

There are an extra fine bunch of horses, all quiet, the smooth kind, and have got the size and quality.

One Engine gang six bottom (Bumley); good as new; both bottom steady and breaker, and a set new shafts each.

Three Harrows (like new).

One Horse Rack.

One set Smithing Harrows.

One set Iron Harrows.

One Stone Boat.

One Set Bob Sleighs (almost new).

One McCormick 5-foot binder (in good shape).

One Massey-Harris 6-foot Mower.

JAS. G. MOFFATT, Proprietor.

One Walking Plough.

One Chalkman Wagon.

One Lora Wagon.

One McCormick Seed Drill (30 inch).

One John Deere Sulky Plough.

One good Wagon Box.

One Buggy, pole and shafts.

Two Buggy Tops.

Four sets good double harness.

One large Water Trough.

One 2 H. P. Gas Engine and Pump Jack complete (a good one).

One Dairy Churn.

One Wheelbarrow, one pump cylinder, one street drum, and hundreds of other articles, such as crowbars, chains, doubletrees, whiffletrees, neck-yokes, shovels, forks, and everything that is found on a well equipped farm.

One Chevrolet Touring Car, 1919 model, good tires; everything in splendid running order.

Three Bedsteads, springs, wash stands, dressers, rockers, kitchen chairs.

One Good Cook Stove.

One heater one extension table, wash tub, boilers, dishes, kettles etc.

One splendid long range pump gun.

F. S. RATLIFF, Auctioneer.

## NEW CITIZENS FOR CANADA

With a population of less than two persons to the square mile compared to England's six hundred, with only five per cent of her rich agricultural lands in the hands of cultivation, with a heavy national indebtedness and only a few people to pay the interest in the form of taxes, the reason why Canada is hungry for immigrants can be understood. Immigration is the human ruin without which Canada must parch and wither up.

If Great Britain had a large surplus of farmers and farm hands, Canada might not have to invite immigrants from any other source. But Great Britain is not so much an agricultural as a mercantile and manufacturing centre, and every year graduates more and more the farmers or farm hands who leave her Colonies for the United States. She is quite willing to send out countless city folk in the hope that they may be transformed into farmers in their new environment, but she has fewer farmers to spare than many other countries from which Canada in the past has drawn excellent settlers. This is illustrated by the homesteaded entries. From 1897 to 1919, only eighteen per cent of the British immigrants came to live for themselves in Western Canada as compared to twenty-seven per cent of the American immigrants and twenty-nine per cent of the foreign born from Continental Europe.

In certain parts of Europe where there is a surplus land none of the land is not enough land to go round. Piles of six acres per family is the land available in certain parts of Belgium, and even so the thirty Belgians who recently brought up a family of ten. The great immigration of Ukrainians from Central Europe who have given Canada nearly 300,000 of her best citizens is due to the lack of sufficient land in Sweden, Norway, Denmark and Poland.

Have these foreign born made good? J. T. M. Anderson, head of the "Education of the New Canadian," says: "I, J. T. M. Anderson, head of the Education of the New Canadian, say that one of two groups at first there was opposition to the farmers of the British, particularly among the older farmers, but they have now found suitable teachers to meet the demands of the school. They are not only in the schools where you find the foreign born, but they are also the students at the University of Manitoba are of foreign parentage, and the children of the foreign born are as good as the native born."

The Immigrant Tide to Canada. Some Recent Pictures.

As leaders in the professions and in the Cabinet of at least one British industry, Canada's chief industry is agriculture, and her agricultural prosperity is due in no small measure to the tens of thousands of new Canadians who have come to the wide acres of the West from the overcrowded cities of Europe and whose children to-day are proud to speak English and to sing "The Maple Leaf for Ever."—A.M.

## PLAIN BUSINESS

Advertising is just plain business. In these days of keen competition no business man can neglect to advertise his wares and hope to succeed.

The buying public are looking through the newspapers to see where they can get the most for their money and if your advertisement does not appear in your home paper they are going to spend their money elsewhere.

The columns of The Review are open to you at reasonable rates and as it goes into nearly every home in Redcliff where the English language is spoken, you are neglecting your business if you do not take advantage of them.

The Review's subscription price is \$2.00 per year

## ITEMS OF LOCAL INTEREST

M. J. Clark spent the Easter holidays in Calgary visiting friends.

Gordon Stone, of the Royal Bank staff, spent the Easter vacation with his parents at Red Deer.

Mrs. Geo. Lyall left last Saturday morning for Moose Jaw where she will visit friends.

Kestley Johnston left this week for Vauxhall to take charge of an irrigation farm in that district.

Robert Stoner, of Bow Slope, spent the Easter vacation with his parents at Red Deer.

Joseph Tarrant was taken to the hospital from a severe attack of eczema.

The Alberta spring show will be held in the fair grounds, Calgary, April 15th to 19th.

Mrs. E. L. Stone left last Thursday for Edmonton to represent the school at the Teachers' convention being held in that city this week.

Are you fond of reading? There are nearly 1,000 good books now at your service in Blundell's Library. You should join; it costs very little.

Miss Viola Kops, who has been visiting friends at Fairbairn, Minn., for the past year, returned home last Thursday.

At Marshfield, Oregon, on Tuesday, March 29th, Nora Coon, formerly of Red Deer, was united in marriage to Mr. Wm. Brewer, of that city.

Mr. and Mrs. Mumm, of Moose Jaw, are spending this week in town, the guests of Mrs. Mumm's sister, Miss Vernon.

Mrs. A. G. Osmond, who has been very sick with typhoid fever for some time, is now recovering and will undoubtedly be around again in a short time.

The regular general meeting of the G. W. V. A. will be held in the club room next Monday evening at 8 o'clock. A full attendance is requested.

Theodore Wood, who has been spending the winter in Chicago and Detroit, returned home yesterday and is now making preparations for putting in his crop.

The Harvest Vale senior U. F. A. will hold a social evening and dance Friday, April 8th, commencing at 8 o'clock. A good time is expected. Gates bring 75 cents; ladies bring lunch.

Mr. and Mrs. John Ellis, who have been spending the winter in Washington, Oregon, and British Columbia, returned home last Saturday. Both are feeling much improved in health as a result of their trip.

A dance will be held in Reid's hall on Friday evening of this week under the auspices of the local orchestra. Dancing will be conducted from 9 a. m. till 2 p. m. All are invited to attend. Admission \$1.00 a couple; extra ladies 25c.

A. Deans, of this town, received the sad news of the sudden death of his father last Wednesday, at Kindred, Sask. Owing to a delay in the delivery of the telegram bringing the news, Mr. Deans was unable to get home in time for the funeral.

Owing to the stormy weather last Friday it was impossible to have the football game advertised for that occasion. The teams are already picked and the game will be played just as soon as weather conditions will permit. The proceeds from this game will go to the relief fund.

James G. Moffatt, who farmed for a number of years in the Bow district, returned from the east yesterday. Mr. Moffatt is arranging to hold an auction sale of all the farm stock and implements on his farm. The sale will be held on Tuesday, April 10th. For a list of articles and other particulars see his adv. on an other page of this issue.

A very pleasant surprise was given Mr. and Mrs. Cann on Friday evening of last week when several of their friends visited them, the occasion being Mr. Cann's birthday. A very joyful evening was spent. Supper was served about midnight, after which the singing of Auld Lang Syne, in party dispersed. The host and hostess gave the guests a hearty invitation to visit them again.

Easter Sunday was fittingly observed at the several churches in town. Services suitable for the occasion were preached and the choirs rendered appropriate music.

The date for the appearance of the Chautauque in Redcliff this season has been set for the week commencing June 6th. In arranging your summer program keep this date in mind.

Arch Deacon Bugert, of Regina, who was in Medicine Hat officiating at the ceremony of dedicating a memorial in Holy Trinity to Mrs. P. Harding, is in town today, the guest of Rev. C. F. Orman.

The Blue birds have put in their appearance again at Redcliff, at their little bird house in Mr. Cann's garden, on Second street, and are already building their nest. This is the fourth year in succession that blue birds have built in the same house.

At the next meeting of the Women's Institute which will be held in the Presbyterian church on Friday afternoon, April 8th, at 3 o'clock, Dr. Shearer will deliver an address on the subject, "The Relationship Between the Church and the Home." This will be an open meeting and all interested are invited to attend.

Mr. A. W. Woodcock celebrated his 76th birthday last Tuesday. As Dr. Shearer's birthday was just the day before the immediate friends of both these boys met at the home of Mr. Woodcock on Tuesday evening to help them celebrate the event. An enjoyable evening of song and story was spent.

Don't forget the popular lecture in the Amuse-U theatre tonight (Thursday) under the auspices of the L. A. of the Presbyterian church. The lecturer is Twigger Jim Shearer and his subject will be "Through the Kindergarten Line." Besides the lecture there will be a musical program in which J. H. Hill, of Medicine Hat, Miss Cruikshank, of Howell, and Mr. J. Potter, of town, will take part. This promises to be one of the most interesting and entertaining evenings of the season. Don't miss it.

HERBERT J. COX  
(Great War Veteran)

Is now operating a Motor Truck Service to Medicine Hat twice daily. Local Draying also attended to. Furniture crated and shipped. P. O. Box 16 Phone 61

When the margin of profit in potato growing is narrow, as it was in places during the past year, it is important to adopt any method which will increase the profits, and the growing of potatoes before planting, particularly where it is intended to dig potatoes for an early market, would be much more general in Canada than it has been.

In 1920, Irish Cobbler potatoes not planted yielded at the rate of 415 bushels per acre while those which had been sprouted yielded 606 bushels per acre, a difference of 88 bushels. In this case potatoes were laid out for sprouting on April 21st and planted in May 19th, or for but four weeks.

It is usually best to allow six weeks for sprouting. Not only is the yield greater when potatoes are sprouted, but the crop reaches a marketable size earlier in the season. The sooner early potatoes are on the market after they are marketable the more money will be made out of them as a rule.
